

## Class 14

### Curves

#### **What is Curve?**

In CorelDRAW, **curves** are used to create objects with a variety of shapes, including straight or curved lines, spirals, and freehand lines. If any new design is to be made, then the Curve tool is used first. Curves are important in graphic design because they can be used to:

- Customize shape
- Create paths
- Edit objects

1

**Click “Convert to Curve option” using mouse right click and press F10 key**

ماؤس کے ذریعے کسی بھی object کو curve کرنے کے لیے

2

**CTRL + Q + F10**

کسی بھی object کو curve کر کے کسی بھی شکل میں تبدیل کرنے کے لیے
