Fill & Outline Colors

What are Color Modes?

Color Modes are the settings designers use to show colors consistently across devices and materials. Commonly used modes are **LAB**, **RGB**, **CMYK**, **index**, grayscale and bitmap, which differ in quality and file size. Designers pick modes to optimize images and ensure these appear identically across media for brand consistency.

The below illustration below shows the difference between LAB, RGB, CMYK, Index, Greyscale and Bitmap color modes. You'll notice how the quality from left (LAB) to right (Bitmap) decreases as the amount of color decreases.

RGB Color Scheme

RGB - Red Green Blue

یہ رنگ آج کے دور کاجدید کلر سکیم ہے۔ کمپیوٹر ،لیپ ٹاپ، موبائل اور ڈیجیٹل کامول میں سے سکیم استعال ہوتی ہے۔
